Summary

As a Full Stack Developer, I excel in designing, developing, and managing innovative technology solutions tailored to solve complex business problems. My expertise spans a broad range of technologies including JavaScript for dynamic applications, React Native for cross-platform mobile development, and Tailwind CSS for crafting modern, responsive websites. I specialize in building visually appealing, user-friendly, and mobile-optimized solutions with clean, maintainable code. My proficiency with Git ensures efficient version control, and I collaborate seamlessly to meet project deadlines. I have experience translating mock-ups and wireframes into functional front-end code, optimizing for speed and scalability, and maintaining brand consistency across designs. With skills in Firebase, MySQL, Canva/Adobe Creative suite(graphic designing), and Trello(for user stories), I deliver high-impact, scalable solutions that align with strategic business goals while adhering to best practices in web design and development.

Education

University of Johannesburg

BCom Information Systems • Johannesburg, Auckland Park

Skills

React Native, Git, SQL, Python, AWS, Firebase, C#, ReactJS, API, Tailwind CSS, Trello, Canva, Adobe Creative Suite

Project Experience

Pack It Buddy App

Full Stack Developer • Johannesburg, Auckland Park   02/2024 - Present

- **Responsible for the design and maintenance of the website, including DevOps Processes & Tools.**
- Repaired and maintained the website on time, ensuring optimal performance and uptime.
- Part of a **team of 6 developers and designers** working together to achieve the same goal, using **Microsoft Teams** for collaboration and **Office 365** for document management and communication.
- Created new applications from scratch using **React JS, Tailwind CSS, and Firebase**.
- Utilized **Agile Methodologies & Backlog Management** to break down projects into smaller, manageable sprints for incremental progress.
- Collaborated with team members using **Microsoft Teams** and **Office 365**, ensuring seamless communication and task tracking throughout the project.

Portfolio Website

Front End Developer • Johannesburg   11/2023 - Present

- One of the key projects I've worked on is [Nthabi's Portfolio](), a fully responsive, visually engaging website showcasing my development skills and design sense.
- The website was built using **React JS** for seamless, interactive user experience, along with **Tailwind CSS** for efficient, modern styling.
- Hosted on **Netlify,** it reflects my focus on continuous improvement, incorporating the latest tools and best practices in web development.
