Johannesburg

Summary

I am a Front-End Developer with a solid Information Systems foundation specializing in software development and database management. My expertise includes working with technologies such as React JS, C#, Python, and Node.js, along with MySQL and Firebase for effective database solutions. I also have experience in creative UI design using platforms like Canva, Figma, and Adobe Creative Suite. With a strong interest in finance transformation and system integrations. I am passionate about solving complex business challenges through innovative, high-quality solutions while continuously growing in collaborative environments.

Education

BCom Information Systems

University of Johannesburg, Johannesburg, Auckland Park
11/2024

Skills

React Native, Git, SQL, Python, Firebase, C#, ReactJS, API, Tailwind CSS, Trello, Canva, Adobe Creative Suite, Microsoft Office

Work Experience

Tundra Tax & Accounting

Internship, Johannesburg, South Africa
06/2022 - 07/2022

- Managed secretarial and administrative tasks to ensure smooth daily operations
- Supported tax management and bookkeeping by preparing and filing tax returns
- Maintained accurate financial documentation
- Enhanced attention to detail and organizational skills
- Developed an understanding of financial processes
- Worked efficiently in a professional and fast-paced environment

Project Experience

Pack It Buddy | **Final year project** | Full Stack

- Designed, maintained, and optimized a website using DevOps processes, ensuring 99% uptime.
- Worked with a team of 6 developers and designers, using React JS, Node JS, Tailwind CSS, and Firebase to build applications from scratch.
- Managed projects with Agile methodologies, breaking tasks into sprints for steady progress.
- Collaborated effectively via Microsoft Teams and Office 365 for communication and document management.
- Our project earned second place in the University of Johannesburg's Applied Information Systems competition for addressing real-world challenges.

Personal Portfolio | Front-End Development
- One of the key projects I've worked on is [Nthabi's Portfolio](#), a fully responsive, visually engaging website showcasing my development skills and design sense.
- The website was built using **React JS** for seamless, interactive user experience, along with **Tailwind CSS** for efficient, modern styling.

- Hosted on **Netlify**, it reflects my focus on continuous improvement, incorporating the latest tools and best practices in web development.
